

## Excella™ MDX

The multi-purpose Excella MDX is a compact check reader and dual-sided scanner that offers a cost-effective alternative to implement PC-based electronic check applications. Ideal for use with Check 21, BOC, and Remote Deposit Capture applications, Excella MDX also enables secure card-based payment transactions with its integrated MagneSafe secure card reader that encrypts card holder data at the point of swipe. The flexible device can also be used with an ID card for strong 2-Factor Authentication during web based financial transactions.

### Benefits

For active merchants, the Excella MDX is a full-featured device in a compact footprint. It enables the double-sided capture of complete check images in a single pass and supports E13B and CMC7 fonts. Using the MagneSafe secure card reader, retailers can also easily secure credit, debit and gift card transactions in addition to capturing check images. Excella MDX connects to PCs and terminals through a USB 2.0 interface and features an easy-to-read LED indicator for visibility in to device status. It's everything retailers need in a secure transaction device, and more.

### Features

- Dual-sided scanning for complete image capture of both sides of the check
